Welcome to UBC Botanical Garden!

We invite you to a unique opportunity for people passionate about plant science. Join Egan Davis for this online information session. Egan will walk you through the format and scope of the program and provide a preview of the learning materials.

Join Horticulture Training Program Principal Instructor, Egan Davis, for this online information session. There will be time at the end of the information session for everyone to ask questions.

Wednesday, March 3, 2021 @ 7-8 pm PST

Learn more at our online information session.

Applications will only be accepted if you complete the online application. This is your chance to get the foundational skills and knowledge you need to advance your career. Whether you want to become a landscape architect, commercial landscaper, arborist or urban farmer, the program will teach you the fundamentals of plant sciences, plant identification, soil management, design, park maintenance, aesthetics, business practices and community awareness. Whether you want to become a landscape architect, commercial landscaper, arborist or urban farmer, the program will teach you the fundamentals of plant sciences, plant identification, soil management, design, park maintenance, aesthetics, business practices and community awareness. Whether you want to become a landscape architect, commercial landscaper, arborist or urban farmer, the program will teach you the fundamentals of plant sciences, plant identification, soil management, design, park maintenance, aesthetics, business practices and community awareness.

Running from late summer to spring, full-time, eight-month program is designed to teach you the fundamentals of plant sciences, plant identification, soil management, design, park maintenance, aesthetics, business practices and community awareness. Whether you want to become a landscape architect, commercial landscaper, arborist or urban farmer, the program will teach you the fundamentals of plant sciences, plant identification, soil management, design, park maintenance, aesthetics, business practices and community awareness. March 2021 in the Garden

Eucalyptus

Eucalyptus is a fascinating genus and worth the adventure seeking between people, plants and environments, and how this relates to agriculture. While enjoying your walk through a good portion of the Garden and seeing plenty of other interesting plants, reaching Eucalyptus coccifera in the E. H. Lohbrunner Alpine Garden. With UBC Botanical Garden’s Spring re-opening, it’s time to check out the eucalypts.
